# Damola Mabogunje

Software Engineer

## WORK EXPERIENCE

Chief Technology Officer 2015 - Present

### Toki Mabogunje & Co (TMC) | Lagos, Nigeria

As C.T.O and Head, Communications and Technology, I am responsible for all of our online digital efforts - including but not limited to the following:

- Website Front & Backend Development
- Digital Marketing
- Business Intelligence & Analytics

Software Engineer 2013 - 2015

### The Math Forum | Philadelphia PA, USA

My time at The Math Forum was spent creating tools for pedagogic teaching and learning at the high school level. In particular, my responsibilities revolved around one all-encompassing tool, aptly named **EnComPass**

- Javascript Front & Backend Development (Node JS, Ember JS)
- NoSQL Database Design (Mongo DB)
- BDD (Regression, Integration, Code Quality, & Unit Tests)

Web Developer 2008 - 2012

### Drexel University | Philadelphia PA, USA

I started working for the Drexel University Computer Science Department as an Undergraduate. At the time, the department was moving from MediaWiki to Drupal, so all my work involved Drupal customizations.

- On-demand Development of Drupal templates, views, and other features
- Content Management, Taxonomy, and Classification
- Data Migration

Application Developer 2009

### JPMorgan Chase & Co | Wilmington DE, USA

At JPMC I worked for the Ethical Hacking Team responsible for evaluating and ensuring the security of the firm's applications. I built a Vulnerability Assessment tool for the team to rate the vulnerability of applications according to the CVSS 2 Standard.

- Windows Application Development (C#)
- Relational Database Design (MySQL)
- Application Architecture (UML)

Application Tester 2008

### PJM Interconnection | Norristown PA, USA

PJM Interconnection manages the high-voltage electric system that provides power to 65 million people in all or parts of 13 states and the District of Columbia. It's the largest power grid in North America. At PJM I was responsible for:

- Testing E-Dart their in-house suite of 24 applications which facilitate their coordination of equipment on the power system.
